Ahmed Ibrahim Abutahoun

nexusrexdev@gmail.com LinkedIn Portfolio Cairo, Egypt

SKILLS

Engines: Godot Engine, Unity Engine

Languages: GDScript, C#, Python

Tools: Git/Github, Aseprite, Ableton, Famitracker

Disciplines: Gameplay Programming, Level Design, Game-feel Iteration, Game Music Composition

EXPERIENCE

Unity Developer Feb 2026 - Present

Genesis Creations · Cairo - Egypt

Unity Developer Intern Jul 2025 - Feb 2026

Genesis Creations · Cairo - Egypt

- Learned the fundamentals of the Unity Engine and C#.
- Contributed in several of the company's projects, mainly targeting VR.
- Contributed to the development of Fruithalla, a wave-based third-person shooter game.

PROJECTS

Fruithalla · A wave-based shooter where fruits are your only weapon against alien invaders. 2026

Play

Unity Developer · Genesis Creations (Bootcamp) · Unity Engine, C#

- Created a responsive, adjustable character controller using KCC with a focus on clean architecture and separation of concerns.
- Implemented 3D sound effects, adaptive music, and layered sound effects.
- Participated in design discussions and collaborated with the bootcamp team.

Bushidash · An arcade game where dashing is the player's only way to attack and move. 2025

Play · Source

Solo Developer · Godot Engine, GDScript, Aseprite, Famitracker

- Designed the gameplay and enemies around dashing as the sole movement and attack mechanic.
- Created the game's pixel-art assets in Aseprite.
- Composed the soundtrack in Famitracker using the Hirajoshi scale.
- Delivered the web build in four days as a solo developer.

Fury and Frosting · An auto-runner platformer where standing still for too long damages the player. 2024

Play · Source

Solo Developer · Godot Engine, C#, Aseprite, Ableton

- Developed the game as a submission for the Gaming Academy 4.0 program.
- Used a finite state machine to create a flexible character controller.
- Designed levels around escalating mechanics and reused them for the final boss fight.
- Created the pixel-art assets in Aseprite.
- Composed an SNES-inspired soundtrack in Ableton using appropriate soundfonts.

Geoshootria · A retro 2D shoot 'em up. 2024

Play · Source

Solo Developer · Godot Engine, GDScript, Aseprite, Famitracker

- Designed two stages with increasing difficulty and a challenging boss at the end of each stage.
- Created a flexible spawner system using Godot custom resources for easier level-pattern authoring.
- Created Game Boy-inspired pixel-art assets in Aseprite.
- Composed an authentic 8-bit chiptune soundtrack in Famitracker.

NinjaCube: Finding Hatsune · A cutesy 2D action platformer inspired by retro classics. 2018

Play

Solo Developer · GameMaker: Studio, GML

- Designed three levels with varied enemy types, stage mechanics, and bosses.
- Created the pixel-art assets while maintaining a soft, cutesy visual style.
- Showcased the game at Run Double Jump 2018 and Insomnia Gaming Festival 2018.
- Managed a booth, conducted live playtesting, and used player feedback to guide polish.

EDUCATION

Bachelor's Degree 2021 - 2025

Helwan University

Faculty of Computers and Artificial Intelligence · Software Engineering Program

CERTIFICATIONS

Gaming Academy 4.0

SAIL for Change, AUB

Java Programming

Information Technology Institute (ITI)
